PROFILE

With 5 years of experience as a React/Next.js developer, I specialize in crafting scalable, user-centric applications such as forecast tools, business dashboards, and eCommerce solutions. My frontend expertise includes TypeScript, Tailwind CSS, and Redux Toolkit, complemented by backend skills in Node.js, Express, and Nest.js. A collaborative team player, I am passionate about integrating AI into my workflow to drive innovation and efficiency.

WORK EXPERIENCE

Team Lead & Senior Software Developer

SparkoSol 2024 - present

As a team lead at SparkoSol, I oversee the development of innovative software, including multimedia marketing applications and surgery-related apps. I utilize Next.js and React for frontend development and Node.js with MongoDB for backend solutions. My responsibilities include leading the team, managing project timelines, and delivering high-quality, scalable applications while mentoring junior developers.

Software Developer

Inspon technologies 2022 - 2024

At Inspon Tech, I focused on developing eCommerce plugins for Shopify and Wix, employing React, Next.js, and TypeScript to create seamless and scalable solutions. Additionally, I played a key role in building a large-scale recruitment management system used in Germany, ensuring the application was robust, efficient, and tailored to meet the demands of a diverse user base.

Associate Software Developer

Eforte solutions 2020 - 2022

At Eforte Solutions, I served as a junior software developer, where I utilized React and Next.js to build business dashboards, forecast systems, and landing pages. My role involved crafting efficient and visually appealing frontend solutions, collaborating with team members to meet project requirements, and enhancing user experiences for business clients.

Volunteer Frontend Developer

2019 - 2022

Noble Missions for Change Initiative

As a volunteer frontend developer at Noble Mission, I leveraged my skills in React.js to design and develop a fundraising website dedicated to supporting education initiatives in Nigeria. My responsibilities included creating a user-friendly and responsive interface to engage visitors and drive donations, contributing directly to the organization's mission.

PROJECTS

Checkeden

<https://checkeden.com>

Checkeden is a web-based application that help users to easily organize and manage all of business's technical processes. It is my side project and I spend my weekend building it.

Technology used

- React.js
- Node.js
- MongoDB
- GraphQL
- Next.js
- Ant design

ZeroSlip

<https://zeroslip.co>

Project description. A ZeroSlip Smart Receipt is a tax-compliant, easily accessible proof of purchase that lives directly in your Customer App, or via SMS. And it's free. ZeroSlip Smart Receipts are intuitive and interactive giving you immediate access to features including:

- Return barcodes and reminders
- Warranty reminders
- Opening hours & social media links for your favorite stores
- Product information and product links
- Unlock digital marketing channel on ZeroSlip Smart Receipt

Emerge Forward

<https://emergeforward.com>

Emerge is the movement for promoting a society where everyone is encouraged to observe, reflect and act in order to come to right conclusions.

SocialFlows

<https://www.socialflows.io>

SocialFlows is an innovative applicant management system, specially developed for social recruiting. It offers you numerous functions to make the recruiting process efficient and effective, giving you more time for strategic decisions.

Wix and Shopify plugins

Create a number of Shopify and Wix plugin to perform different tasks. Using frameworks like Next.js, Nest.js and React.js for frontend scripting
